Wesley Kalatai Alberti

Software Engineer | Fullstack Dev | Cybersecurity

Madrid, Community of Madrid, Spain

Summary

I am a highly motivated professional with a passion for cutting-edge technology and its practical applications. I hold a Bachelor's degree in Computer Science, specializing in Robotics and Embedded Systems, and holding two Master's, one in the prestigious European Master of Software Engineering program at the Universidad Politécnica de Madrid, and another in Cybersecurity and Privacy, at the Universitat Oberta de Catalunya.

Throughout my academic journey, I have developed a keen interest in data science, network security, and the transformative potential of robotics in the field of agriculture. By combining my theoretical knowledge with practical experience, I have honed my problem-solving and customer care skills while working with the EHHS Information Technology team at Kent State University.

In addition to my academic pursuits, I have undertaken various personal projects that have allowed me to explore different web development frameworks and techniques. I am constantly pushing the boundaries of my programming abilities and enjoy creating automation tools using a wide range of programming languages.

I thrive in dynamic environments that require adaptability and a strong drive for innovation. With a solid foundation in computer science and a relentless desire to learn, I am committed to making a meaningful impact in the world of digital content management. Let's connect and explore new opportunities to collaborate and contribute to the advancement of technology and its impact on society.

Experience

Akkodis

Senior Full Stack Developer

April 2025 - Present (1 year 3 months)

Madrid, Community of Madrid, Spain

- Spearheaded the creation and deployment of secure, high-performance web applications for a premier European financial services firm, focusing on robust solutions that enhance client experiences while adhering to stringent regulatory standards.
- Directed full-stack development initiatives, utilizing Spring Boot for backend services and React for dynamic frontend interfaces, ensuring seamless integration and optimal user interactions in financial ecosystems.
- Implemented advanced security protocols and practices, including authentication mechanisms, encryption strategies.
- Engineered scalable APIs and microservices using Java, Node.js and Python, facilitating efficient data exchange and interoperability across diverse financial platforms and third-party systems.
- Automated operational workflows through scripting in Python, Node.js, Bash and PowerShell, streamlining deployment processes, reducing downtime, and boosting overall system reliability in high-stakes environments.
- Championed the integration of AI-driven tools and methodologies, applying best practices to accelerate development cycles while elevating code quality, accuracy, and innovation without compromising security or compliance.
- Performed thorough code reviews and quality assurance testing, employing industry-leading tools to identify and resolve issues, ensuring deliverables meet the highest standards of performance and resilience.
- Collaborated with cross-functional teams on agile project management, contributing to sprint planning, risk assessment, and continuous improvement.
- Developed comprehensive documentation and conducted knowledge-sharing sessions for team members and stakeholders, promoting best practices in secure coding.
- Analyzed system performance metrics and user feedback to drive iterative enhancements, leveraging data insights to refine features and improve efficiency in financial service delivery.

IDOM Consulting, Engineering, Architecture

DevOps Engineer

October 2023 - March 2025 (1 year 6 months)

Madrid, Community of Madrid, Spain

- Integrated a team that spearheaded the development and implementation of cutting-edge technological solutions aimed at modernizing port infrastructure.
- Expertly managed and optimized the Atlassian stack (Confluence, Jira, Bitbucket, Bamboo) to streamline project workflows, enhance collaboration, and ensure efficient version control and CI/CD pipeline management.

- Conducted rigorous QA processes using Zephyr, ensuring high-quality deliverables and adherence to project requirements across multiple initiatives.
- Oversaw the design and implementation of robust API solutions using Apicurio, OpenAPI, AsyncAPI, and Pact Broker, ensuring seamless integration and interoperability across systems.
- Set up and maintained Keycloak SSO to enhance security and simplify user authentication across multiple applications and platforms.
- Orchestrated and managed containerized infrastructure, deploying robust applications using Docker ensure scalability, reliability, and efficient resource utilization.
- Delivered impactful presentations and developed comprehensive training materials for clients and stakeholders, fostering knowledge transfer and enabling successful project adoption.
- Conducted in-depth data analysis to drive decision-making in Smart Ports projects, leveraging insights to optimize operational efficiency and innovation.
- Supported project management activities, including quality assurance, software testing, and risk mitigation, ensuring timely and successful project delivery.
- Participated on Artificial Intelligence initiatives, exploring and implementing state-of-the-art practical AI applications to address challenges and drive innovation within the port environment.
- Developed and deployed a variety of internal tools to automate processes and enhance team productivity.

Freelance

Full Stack Developer

May 2022 - October 2023 (1 year 6 months)

- Participated in various projects spanning web, mobile, and desktop platforms, providing clients with custom solutions. Mastered the latest technologies and frameworks to create user-centered applications that meet client requirements.
- Architected a digital signage solution for document processing, ensuring compliance with Brazilian and European digital signature laws and standards, enhancing security and regulatory adherence.
- Mastered web application development using cutting-edge technologies, including JavaScript, TypeScript, Node, React, Angular, Vue, PHP, and Laravel.
- Managed and maintained SQL databases like MySQL, MariaDB, SQLite, and also NoSQL databases such as MongoDB and CouchDB, focusing on best practices for data optimization, performance, and security.

- Leveraged Java and React to design and implement robust, scalable web applications, ensuring high performance and seamless user experiences.
- Utilized Docker and Kubernetes to containerize and orchestrate applications, streamlining deployment processes and enhancing scalability across diverse environments.
- Developed and deployed custom desktop applications for a diverse clientele using Python and Java, ensuring alignment with specific project requirements and client needs.
- Undertook innovative projects, including desktop applications built with Python & Qt and web applications using C# & Blazor, resulting in a richer and more diverse portfolio.
- Played a key role in API integration decisions, ensuring the selection of optimal and performance-oriented frameworks and technologies.
- Focused on code quality and consistency by incorporating thorough code review processes and leveraging version control tools, improving collaboration across teams and projects.
- Consistently stayed updated with the latest trends in web, mobile, and desktop development, ensuring the delivery of modern and efficient applications for clients.

Kent State University

IT Systems Administrator

August 2021 - August 2022 (1 year 1 month)

Kent, Ohio, United States

- Key member of a specialized technical support team responsible for maintaining the critical technology infrastructure of the faculty.
- Efficiently managed a high volume of support requests, prioritizing and resolving issues to minimize downtime and maximize productivity for academic staff.
- Demonstrated advanced troubleshooting and repair skills across a wide range of equipment, including computers, printers, monitors, and peripheral devices.
- Provided on-site technical support in faculty offices and classrooms, ensuring quick resolution of urgent issues and maintaining the continuity of academic activities.
- Developed a strong understanding of the specific technological needs of the academic environment, tailoring solutions to meet the unique requirements of the faculty.
- Maintained a high level of user satisfaction through effective communication and exceptional customer service.

UnderControl Software

Java Software Engineer

January 2016 - July 2018 (2 years 7 months)

Curitiba, Paraná, Brazil

- Pioneered the development of the company's first-ever mobile application, transforming their ecosystem from zero mobile presence to a fully functional Android app built with Java and Kotlin, enabling seamless communication with a central PHP server for real-time data exchange and synchronization.
- Led agile development teams utilizing GitHub for version control, CI/CD pipelines, and collaborative workflows, streamlining project deliveries while enhancing overall efficiency, productivity, and deployment reliability.
- Engineered a robust desktop application in C# that integrated with the central PHP server, ensuring consistent and reliable data flow across diverse platforms.
- Spearheaded the implementation of a web version that extended the mobile app's features to the browser using JavaScript, React, and Node.js, delivering a unified and pleasant user experience for those already familiar with the mobile interface, thereby boosting accessibility and satisfaction.
- Collaborated on defining database architecture and drove key technology decisions to optimize performance, scalability, and system resilience.
- Conducted on-site field visits to gather requirements for Android app development, employing a user-centered design approach to identify client pain points and craft customized, effective solutions.
- Directed API integration strategies and framework selections, enhancing cross-platform performance, interoperability, and overall functionality.
- Designed and implemented a secure digital signing and validation system for ERP-handled documents, ensuring compliance with Brazilian Receita Federal requirements for electronic invoices (Notas Fiscais), streamlining fiscal processes and enhancing regulatory adherence.

BTCC Conexão Cliente

Phone Representative

July 2015 - December 2015 (6 months)

Curitiba Area, Brazil

Indústria e Comercio de Madeiras A.Z.A.

Office Intern

January 2013 - July 2015 (2 years 7 months)

Imbituva, Paraná, Brazil

Education

Universidad Politécnica de Madrid

Master's degree, Computer Software Engineering · (August 2022 - May 2024)

Universitat Oberta de Catalunya

Master's degree, Computer and Information Systems Security/Information Assurance · (September 2024 - July 2025)

Kent State University

Bachelor of Science - BS, Computer Science · (August 2018 - May 2022)

Kent State University

Associate of Science - AS · (August 2018 - August 2020)
